### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Applicant's arguments filed 01/14/2007 are persuasive. Claims 14-25 as amended and claims 26 and 44 are allowable over the prior art of record for at least the reason that the prior art fails to teach or suggest a system for maintaining an IC-module under test near a constant set-point temperature while electrical power dissipation in said IC-module is varied; said system being comprised of: a container having an open end with a seal for pressing against said IC-module while said IC-module is under test. said container being detachable from said IC-module in combination with all other limitations of the claim 14. Claims 27-43 are allowable over the prior art of record for at least the reason that the prior art fails to teach or suggest a system for maintaining an IC-module near a set-point temperature while electrical power dissipation in said IC-module is varied; said system being comprised of: a container having an open end with a seal for pressing against said IC-module; and one or more heating elements to add heat to said IC-module when the power dissipated by said IC-module decreases by an amount that would cool said IC-module below said set point, in combination with all other limitations of the claim 27.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
